

AGENCY SUCCESS FACTORS

We have undertaken extensive research to find out what makes an Agency successful, by interviewing over 140 Agents and their staff from different Agencies across the UK. When comparing their practices to their business results, several distinct factors were linked to better business performance. When looking to appoint new Agents across the network, we use these factors in our assessment processes to measure candidates' suitability. We've outlined each factor below, to be used as a guide when attending an assessment centre.
